PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building an AI-integrated voice calling platform and production MERN-stack applications. Comfortable across backend architecture, REST API design, authentication, and cloud deployment, with a track record of shipping features in fast-moving, small-team environments. Winner of multiple hacktcons.

EDUCATION

Andhra Loyola Institute of Engineering & Technology (ALIET)

Sep 2023 – May 2027

B.Tech Computer Science & Engineering | CGPA: 8.7 | Vijayawada, AP

Narayana Junior College, Nellore

Jun 2021 – May 2023

Intermediate (MPC) | 95.3%

Lumbini Vidyalayam, Nellore

May 2021
SSC | 96.5%

EXPERIENCE

AI Agents & Full-Stack Developer Intern

Present

- Contribute to an AI-powered automated calling system integrated into a TeleCRM product, working across Node.js services, LLM prompt integration, and speech-to-text/text-to-speech pipelines.
- Build React frontend features for live campaign and lead views, including real-time status polling and call control actions used by the operations team.
- Support a telephony migration from Twilio to Exotel to restore outbound calling to Indian phone numbers, integrating WebSocket-based call streaming.
- Containerize backend services with Docker for consistent local and production deployment.
- Collaborate with an ML engineer and cross-functional teammates to debug latency issues across the calling pipeline and improve reliability.

Full-Stack Developer Intern

may 2026-june

2026

- Built a full-stack restaurant management platform for a U.S.-based client using the MERN stack, including an admin dashboard and customer-facing ordering flow.
- Designed backend REST APIs, MongoDB data models, and authentication for the platform, and implemented a responsive frontend UI.
- Deployed and maintained the application in production using Render and Vercel, resolving bugs across the stack post-launch.

Python Programming Intern — Vaishnav Technologies

May 2025 – Jun 2025

- Built 3 Python projects covering file-handling automation, OOP-based data processing, and standalone workflow utilities for real-world company operations, reducing manual task time.
- Worked in a production environment on professional project structuring; completed under the Startup India & Skill India initiative. Cert No: VTP-241920.

PROJECTS

AI-Powered HR Recruitment Automation Platform

github.com/ahmadjaved79/AITS

- Built an end-to-end recruitment pipeline where HR posts job openings on a portal and students apply directly, removing manual intake work.
- Implemented an ATS-style resume scanning and ranking engine to automatically score applicants against job requirements and surface top candidates.
- Built an AI validation layer that reviews ranked applicants and automatically triggers online assessment links to shortlisted students.
- Designed an agent workflow that consolidates assessment outcomes and finalizes the best-fit candidates for HR review, reducing manual screening effort.

Technologies: Node.js, React, Supabase, Python FastAPI + spaCy + sentence-transformers (BERT), JWT, Tailwind CSS

AI-Powered Real-Time Sign Language Translation System

github.com/maheshgutha/AI-Powered-Sign-Language-Translation-Using-Computer-Vision-and-Robotic-Hand

- Built a real-time system that recognizes hand gestures via computer vision, converts them to speech, and replicates them through a robotic hand to support hearing- and speech-impaired users.
- Implemented bidirectional text-to-sign and sign-to-speech translation, backed by a cloud logging layer and a real-time analytics dashboard.
- Integrated Telegram notifications for real-time alerts, improving communication accessibility, and monitoring.

Technologies: Python, OpenCV, MediaPipe, Arduino, React, Supabase.

Placement & Internship Management Portal

github.com/maheshgutha/internship

- Deployed a secure full-stack placement workflow app serving 50+ pilot users; built an NLP-based resume screening engine that improved candidate-job matching accuracy by 30%.
- Implemented encrypted auth, RBAC, AI chatbot for eligibility checks, and bias-aware ranking logic for fair candidate shortlisting.

Technologies: ReactJS, Python, Flask, SQL, NLP

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Frontend: React.js, HTML, CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, SQL

AI & Voice: LLM API integration (GPT-4.1 mini), speech-to-text/text-to-speech pipelines, telephony integration (Exotel, Twilio)

Tools & Platforms: Git, GitHub, Docker, AWS, Postman, Render, Vercel

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems, DBMS, Computer Networks, System Design, Authentication & Authorization, MVC Architecture, JWT, Machine Learning, Deep Learning

CERTIFICATIONS & ACHIEVEMENTS

- Infosys Springboard — Virtual Internship 7.0 (AI), Artificial Intelligence Primer Certification (Apr 2026), Principles of Generative AI Certification (Apr 2026)
- 1st Prize — TechXelerate 2026 Hackathon , Smart Tech Hackathon 2026
- ExcelR EdTech Pvt. Ltd. (in collaboration with APSCHE) — Short-Term Internship Certificate in Deep Learning / NLP / Artificial Intelligence, 3 Credits (04 May 2026 – 27 June 2026). Cert No: EXCELR-I-57043
- NPTEL (IIT Guwahati) — Design & Implementation of Human-Computer Interfaces, 56% score, 12-week course (Jul–Oct 2025). Roll No: NPTEL25CS135S1272102101
- NPTEL Elite (IIT Madras) — Social Networks, 64% score, 12-week course (Jan–Apr 2026). Roll No: NPTEL26CS82S468101411

LEADERSHIP & EXTRACURRICULAR

- Hackathon Team Lead: Led cross-functional teams of 3–4 across multiple hackathons (TechXelerate 2026, Smart Tech 2026), delivering AI, automation, and full-stack prototypes under time-constrained conditions; secured 1st Prize and Certificate of Excellence.
- Sports: Represented the department in intra-college Cricket, Kabaddi, and Volleyball tournaments.
